

JABSCO
a xylem brand

Manual Marine Toilet With Twist and Lock Handle

The pump assembly is angled forward to provide a natural smooth stroke action and the convenient top mounted dry bowl selector is easy to operate. If desired, the pump and base can be assembled for left hand installation. The base assembly is fully skirted to eliminate the debris traps associated with most other toilets. Should the seal ever need to be replaced, the external seal and rod guide

\$174⁹⁹

assembly can be easily removed without disassembling the pump. Dimensions: 17 $\frac{1}{4}$ " W x 10 $\frac{1}{4}$ " D x 13 $\frac{3}{16}$ " H.

No. ITT 290903000

Electronic Sensing Bilge Pumps

No Float Switch Needed! Sensing bilge pumps work on the principle of impeller resistance. The pump will turn on every 2-1/2 minutes for about one second to sense for water. If water is present, the pump will sense resistance and continue to run until all water is removed. After that, it will resume checking for water every 2-1/2 minutes.

- Completely automatic with manual override - No Float Switch Needed!
- Check valve included with hidden air vent to prevent airlocking.
- True electromagnetic suppression (EMC)
- A built-in thermal cell that protects the pump and the vessel when things get too hot.

BIMINI TOPS AND COVERS

Bimini Tops with Matching Boot

- Full Frame Tops
- No assembly required
- Easy do it yourself installation
- No freight charges on stocked tops

Our bimini tops are offered in two top quality materials:

- 9.25 oz. Sunbrella 100% woven acrylic material with a finish that resists water, mildew, rot, sun and fading. Available in the following colors: Aqua Marine, Burgundy, Cadet Gray, Navy, Pacific Blue, and Mediterranean Blue.
- 14 oz. White vinyl with denim backing that features a waterproof, all-weather finish that is resistant to dirt, grease, and mildew. Easy to handle, fold and store.

HOW TO SELECT A BIMINI TOP FOR YOUR BOAT

To select a bimini top for your boat you will need to know the length, height and width of top your boat requires.

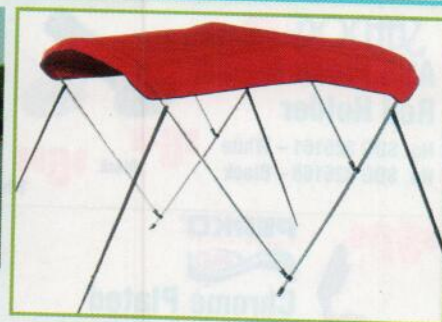

- First determine what portion of your boat you want the top to cover.

The tops come in 5', 5'6", 6', 8' and 9' lengths.

- Next, determine where you want the top mounted. Measure the width between these two points to determine the width of your top. All mounting hardware is included with our tops including universal deck hinges with 90 degree stops to allow mounting in virtually any position.

- Then, stand inside your boat and measure the distance in height from the mounting points to the height you desire. This will help you determine how high your top needs to be.

Go to Carvercovers.com to select your Style and Fabric. Hundreds of Styles are in Stock for Immediate Shipment
